Git Cheat Sheet

Initialize a new git repository: **git init**

Check the status of your repository: **git status**

Add changes to the next commit: **git add [file]**

Commit changes: **git commit -m "[message]"**

View commit history: **git log**

Push changes to a remote repository: **git push [remote] [branch]**

Pull changes from a remote repository: **git pull [remote] [branch]**

Create a new branch: **git branch [branch name]**

Switch to a different branch: **git checkout [branch name]**

Merge a branch into your current branch: **git merge [branch name]**

View differences between branches: **git diff [branch name]**

View all branches: **git branch -a**

Delete a local branch: **git branch -d [branch name]**

Delete a remote branch: **git push [remote] --delete [branch name]**

Note: [remote] and [branch] should be replaced with the actual remote and branch names.
